PROFESSIONAL SUMMARY

Industrial Civil Engineer with 7+ years of experience in Business Intelligence, operational control and advanced analytics in retail and commercial environments. Specialist in Power BI (star schema, DAX, RLS), SQL, Python and AI Agents. Track record of building tools that C-level and operational teams actually use daily — reducing reporting cycles from days to hours, detecting fraud across 600+ locations nationwide, and aligning commercial incentives with real business outcomes.

EXPERIENCE

Senior BI & Loss Prevention Analyst

Empresas SB · 2019 – Present · Santiago, Chile

- Architected end-to-end BI solutions in Power BI (star schema, DAX, RLS) consumed daily by C-level and operational teams — cutting reporting cycles from days to hours.
- Built anomaly detection models in Python + SQL monitoring loss and fraud signals across **600+ nationwide retail locations**, strengthening internal control significantly.
- Designed the national commercial KPI model (RANKX, TOPN, CALCULATE) aligning salesperson incentives with real business outcomes — deployed across all branches.
- Optimized inventory management through stockout and overstock analytics, reducing dead stock and improving category replenishment cycles.
- Led the national bonus calculation process, ensuring full traceability and precision across all commercial areas.
- Monitor retail-supplier commercial agreement performance through KPI analysis (Loss/Purchase ratio), identifying deviations and providing data-driven evidence to support contract renegotiations.

Professional Internship — Modeling & Methodology Dept.

SBIF (Chilean Financial Regulatory Authority) · 2018 · 2 months

- Research, creation and study of probabilistic models to understand phenomena in the Chilean banking sector, laying the foundations of Basel II (Basel Committee on Banking Supervision).

Operational Internship

ICIL-ICAFAL · 2017

- Supported machinery rental, maintenance and fleet management operations.

EDUCATION

Industrial Civil Engineering · Universidad Diego Portales, Santiago, Chile

CERTIFICATIONS & MASTERS

- **Master in Power BI** — UTN Curitiba, Brazil
- **Master in Python** — UTN Curitiba, Brazil
- **Master in Artificial Intelligence** — UTN Curitiba, Brazil · In progress

TECH STACK

Expert: Power BI · DAX · Power Query · SQL · Excel

Advanced: Python · STATA · SPSS · Claude AI · AI Agents

Methods: Star Schema · Snowflake · ETL · RLS · Drill-through · Bookmarks

KEY RESULTS

- ↓ 50% reporting time via executive Power BI dashboards with DAX time intelligence
- 600+ locations monitored for fraud & loss prevention nationwide
- ↑ Commercial ROI through national KPI incentive model (RANKX · TOPN · CALCULATE)
- Retail-supplier agreement monitoring with KPI Loss/Purchase ratio analysis
